Sharq API Documentation

The following descriptions the list of endpoints Sharq's backend provides:

Base URL: http://sahifa-app.com/api/v1/
(If you click the URL above, you will be presented with an interface that shows the list of available endpoints)

Note: All parameters are required, unless stated otherwise.

User Related Endpoints

Registration Endpoint

Endpoint:

```
/user/register
```

Allowed Methods:

```
POST
```

Parameters:

```
email, fullname, password
```

Returns:

```
{
   "token": "75eb9e7afaedd82653b4b5eed00a9ecfdb26d835",
   "user": {
      "email": "rakan.alhneiti123@gmail.com",
      "facebook_connected": false,
      "first_name": "Rakan",
      "google_connected": false,
      "id": 6,
      "is_registered": true,
      "last_name": "Alhneiti",
      "profile_pic": null
   }
}
```

Social Registration Endpoint

Endpoint:

```
/user/register_social
```

Allowed Methods:

POST

Parameters:

email: Required
full_name: Optional
password: Required
google_token, facebook_token: At least one of them is required. These can be the user's ID from the service itself or the auth token. This is not checked in the backend, so any valid identifier could work.

Returns:

```
{
    "created": false,
    "token": "75eb9e7afaedd82653b4b5eed00a9ecfdb26d835",
    "user": {
        "email": "rakan.alhneiti123@gmail.com",
        "facebook_connected": false,
        "first_name": "Rakan",
        "google_connected": false,
        "id": 6,
        "is_registered": true,
        "last_name": "Alhneiti",
        "profile_pic": null
    }
}
```

Login Endpoint

Endpoint:

/user/login

Allowed Methods:

POST

Parameters:

email, password

Returns:

```
{
    "token": "75eb9e7afaedd82653b4b5eed00a9ecfdb26d835",
    "user": {
        "email": "rakan.alhneiti123@gmail.com",
        "facebook_connected": false,
        "first_name": "Rakan",
        "google_connected": false,
        "id": 6,
        "is_registered": true,
        "last_name": "Alhneiti",
        "profile_pic": null
    }
}
```

Guest Login Endpoint

Endpoint:

/user/guest

Allowed Methods:

POST

Parameters:

device_id

Returns:

```
{
   "token": "ff4d3d24b869864d2be7e20ef20ac3f0957c6934",
   "user": {
      "email":
"guest_sdlkfjklsdfjkdslfjlds_223c9714-3b9b-11e6-b20f-080027c2d293@sharq.com",
      "facebook_connected": false,
      "first_name": "",
      "google_connected": false,
      "id": 7,
      "is_registered": false,
      "last_name": "",
      "profile_pic": null
   }
}
```

Logout

Endpoint:

/user/logout

Allowed Methods:

```
POST
```

Headers:

```
Authorization: Token {TOKEN}
```

The token is acquired from the login / registration endpoints described above.

Parameters:

```

```

Returns:

```
{
    "message": "successfully logged in"
}
```

Account Info Fetch / Update

Endpoint:

```
/user
```

Allowed Methods:

```
GET, POST
```

Headers:

```
Authorization: Token {TOKEN}
```

The token is acquired from the login / registration endpoints described above.

Parameters:

```
GET -> No params required
POST:
full_name
password
profile_pic (File upload) (Content-Type: Multipart/form-data)
```

Returns:

```
GET:
{
    "email": "rakan.alhneiti123@gmail.com",
    "facebook_connected": false,
    "first_name": "Rakan",
    "google_connected": false,
    "id": 6,
    "is_registered": true,
    "last_name": "Alhneiti",
    "profile_pic": null
}

POST:
{
    "email": "rakan.alhneiti123@gmail.com",
    "facebook_connected": false,
    "first_name": "Rakan",
    "google_connected": false,
    "id": 6,
    "is_registered": true,
    "last_name": "Alhneiti",
    "profile_pic": null
}
```

Forgot Password

Endpoint:

/user/forgot_password

Allowed Methods:

POST

Headers:

Authorization: Token {TOKEN}

The token is acquired from the login / registration endpoints described above.

Parameters:

email

Returns:

HTTP Code 200 for success, 404 in case email was not found, 400 if email is missing, 500 is email wasn't sent.

Update User Device

Provide the system with the Device ID or Token provided by Apple Notification service or Google Cloud Messaging for push notifications.

Endpoint:

/user/devices/update

Allowed Methods:

POST, DELETE

Headers:

Authorization: Token {TOKEN}

The token is acquired from the login / registration endpoints described above.

Parameters:

POST:
type: android, ios
key

DELETE:
key

Returns:

POST: 201 HTTP code on success, 400 on bad request

DELETE: 200 HTTP code on success, 400 on bad request

Countries

Fetch Countries

Endpoint:

```
/country/list
```

Allowed Methods:

```
GET
```

Headers:

```
Authorization: Token {TOKEN}
```

The token is acquired from the login / registration endpoints described above.

Parameters:

```
page: 1, 2, 3 … etc
```

Returns:

```
{
    "count": 1,
    "next": null,
    "previous": null,
    "results": [
        {
            "code": "jo",
            "id": 1,
            "name": "Jordan"
        }
```

```
    ]
}
```

User Countries

The list of countries followed by the user

Endpoint:

```
/country/mine
```

Allowed Methods:

```
GET
```

Headers:

```
Authorization: Token {TOKEN}
```

The token is acquired from the login / registration endpoints described above.

Parameters:

```
page: 1, 2, 3 … etc
```

Returns:

```
{
    "count": 1,
    "next": null,
    "previous": null,
    "results": [
        {
            "code": "jo",
```

```
      "id": 1,
      "name": "Jordan"
    }
  ]
}
```

Follow Countries

Endpoint:

```
/country/add
```

Allowed Methods:

```
POST
```

Headers:

```
Authorization: Token {TOKEN}
```

The token is acquired from the login / registration endpoints described above.

Parameters:

```
ids: comma separated country IDs
```

Returns:

```
HTTP 200 on success, 400 on bad request
```

Unfollow Countries

Endpoint:

```
/country/remove
```

Allowed Methods:

```
POST
```

Headers:

```
Authorization: Token {TOKEN}
```

The token is acquired from the login / registration endpoints described above.

Parameters:

```
ids: comma separated country IDs
```

Returns:

```
HTTP 200 on success, 400 on bad request
```

Interests

Fetch Interests

Endpoint:

```
/interest/list
```

Allowed Methods:

```
GET
```

Headers:

```
Authorization: Token {TOKEN}
```

The token is acquired from the login / registration endpoints described above.

Parameters:

```
page: 1, 2, 3 … etc
```

Returns:

```
{
   "count": 2,
   "next": null,
   "previous": null,
   "results": [
      {
         "id": 1,
         "name": "Local",
         "subscribed": false
      },
      {
         "id": 2,
         "name": "Business",
         "subscribed": false
      }
   ]
}
```

User interests

The list of interests followed by the user

Endpoint:

```
/interest/mine
```

Allowed Methods:

```
GET
```

Headers:

```
Authorization: Token {TOKEN}
```

The token is acquired from the login / registration endpoints described above.

Parameters:

```
page: 1, 2, 3 … etc
```

Returns:

```
{
    "count": 2,
    "next": null,
    "previous": null,
    "results": [
        {
            "id": 1,
            "name": "Local",
            "subscribed": false
        },
```

```
    {
        "id": 2,
        "name": "Business",
        "subscribed": false
    }
  ]
}
```

Follow interests

Endpoint:

```
/interest/add
```

Allowed Methods:

```
POST
```

Headers:

```
Authorization: Token {TOKEN}
```

The token is acquired from the login / registration endpoints described above.

Parameters:

```
ids: comma separated interest IDs
```

Returns:

```
HTTP 200 on success, 400 on bad request
```

Unfollow interests

Endpoint:

/interest/remove

Allowed Methods:

POST

Headers:

Authorization: Token {TOKEN}

The token is acquired from the login / registration endpoints described above.

Parameters:

ids: comma separated interest IDs

Returns:

HTTP 200 on success, 400 on bad request

Websites

Fetch Websites

Endpoint:

/website/list

Allowed Methods:

GET

Headers:

Authorization: Token {TOKEN}

The token is acquired from the login / registration endpoints described above.

Parameters:

page: 1, 2, 3 … etc

Returns:

```json
{
    "count": 1,
    "results": [
        {
            "id": 1,
            "image": {
                "caption": "asdas",
                "file": "http://192.168.0.10:8080/media/images/2016/06/18/image.gif",
                "height": 300,
                "width": 200
            },
            "name": "Khaberni"
        }
    ]
}
```

Feeds

Fetch Feeds

Endpoint:

```
/feed/list
```

Allowed Methods:

```
GET
```

Headers:

```
Authorization: Token {TOKEN}
```

The token is acquired from the login / registration endpoints described above.

Parameters:

```
website_id: The website ID to display feeds from
type: to either fetch "categories" or "writers", default is category if not provided
since: A date/time value to only fetch feeds added after that date/time (optional)
(format: YYYY/mm/dd HH:mm:ss)
page: 1, 2, 3 … etc
```

Returns:

```
{
    "count": 1,
    "results": [
        {
            "id": 1,
            "is_subscribed": null,
```

```
        "title": "نبض الشارع",
        "type": "category",
        "website": {
           "id": 1,
           "image": {
              "caption": "asdas",
              "file": "http://192.168.0.10:8080/media/images/2016/06/18/image.gif",
              "height": 300,
              "width": 200
           },
           "name": "Khaberni"
        }
     }
   ]
}
```

Subscribe to Feed

Endpoint:

```
/feed/subscribe
```

Allowed Methods:

```
POST
```

Headers:

```
Authorization: Token {TOKEN}
```

The token is acquired from the login / registration endpoints described above.

Parameters:

feed_id

Returns:

HTTP 200 for success, 400 or 404 otherwise

Notify on Feed updates

Endpoint:

/feed/notify

Allowed Methods:

POST

Headers:

Authorization: Token {TOKEN}

The token is acquired from the login / registration endpoints described above.

Parameters:

feed_id

Returns:

HTTP 200 for success, 400 or 404 otherwise

Articles

Newsfeed

This is the main endpoint that is to be used to fetch articles using certain filters described below.

Endpoint:

```
/newsfeed
```

Allowed Methods:

```
POST
```

Headers:

```
Authorization: Token {TOKEN}
```

The token is acquired from the login / registration endpoints described above.

Parameters:

```
filters: This should be sent as a list of JSON objects
Example:
filters = [
{
   "type": "country",
    "name": "jordan"
},
{
   "type": "interest",
    "name": "local"
},
{
```

```
    "type": "keyword",
     "name": "داعش"
},
{
    "type": "category",
     "id": 2,
}
]
```

Available filter types:
category, keyword, interest, country

Values should be as follows:
For keywords, the keyword (content) itself should be provided.
For interest, the interest (name) itself should be provided
For country, the country (name) should be provided
For category, the category (ID) should be provided

Returns:

```
{
    "count": 1,
    "results": [
      {
        "body": " ",
        "channel_id": 1,
        "channel_name": "نبض الشارع",
        "channel_type": "category",
        "country_id": [
            1
        ],
        "country_name": [
            "Jordan"
        ],
        "date_published": "2016-03-13T21:36:00",
        "interest_id": [
            1
```

```
        ],
        "interest_name": [
            "Local"
        ],
        "is_favorite": false,
        "is_readlater": false,
        "item_id": "336",
        "photos":
"http://192.168.0.10:8080/media/images/2016/03/14/1457908553_JyY9BxE.jpg"
        ],
        "status": 1,
        "summary": "إن هتافات الطلبة فإن الأردني التلفزيون عبر بها أدلى التي الطراونة تصريحات وبحسب
التي الحملات مئات بل عشرات n\.المعتصمين يظهر بها النفس الحزبي شبيهة بالهتافات التي أطلقت في سوريا وتونس
قامت بها النقابات ومراكز جمعيات حقوقية واحزاب بل واشخاص كافراد دون ان تطلب ترخيص لهذه الحملات ، هل
سمعت يوماً بقانون ترخيص الحملات مثلاً؟!، لماذا قمت يا استاذنا الفاضل بالاتصال بمنسق الحملة اكثر من عشر مرات
وفي مواقف مختلفة وطلبت لقاءنا بل واستقبلتنا في مكتبك بناءً على طلبك قبل ثلاثة اعوام، لماذا قمت بذلك طالما ترى ان
هذه الحملة غير مرخصة وان على وزير الداخلية حبسنا؟!، ولماذا قمت بالاتصال بنا عندما كنت رئيساً لجامعة البلقاء
وكانت ذبحتونا تخوض آنذاك اعتصاماً لطلبة الشامل احتجاجاً على الامتحانات وقمت انت حينها بالاستجابة المباشرة
المطالبنا؟، هل لغة الاعتقال والحبس والوعيد ومطالبة وزارة الداخلية بحبس طلبتك هي لغة اكاديمية؟n\,",
        "thumbnail": null,
        "title": "فيديو - الطراونة: نفس حزبي بشعارات المعتصمين",
        "url": "http://192.168.0.10:8080/article/336",
        "videos": null,
        "website_id": 1,
        "website_image": null,
        "website_name": "Khaberni"
    }
  ]
}
```

Fetch Articles

This endpoint could be used as an alternative to the newsfeed to fetch articles by ID or by Feed ID. But it doesn't follow the same conventions that newsfeed endpoint implements.

Endpoint:

/article/list

Allowed Methods:

GET

Headers:

Authorization: Token {TOKEN}

The token is acquired from the login / registration endpoints described above.

Parameters:

Either feed_id or article_id to fetch articles by feed or a single article by ID
page: 1, 2, 3 … etc

Returns:

```
{
    "count": 1,
    "results": [
        {
            "body": " ",
            "channel_id": 1,
            "channel_name": "نبض الشارع",
            "channel_type": "category",
            "country_id": [
                1
            ],
            "country_name": [
                "Jordan"
            ],
            "date_published": "2016-03-13T21:36:00",
            "interest_id": [
```

```
          1
      ],
      "interest_name": [
        "Local"
      ],
      "is_favorite": false,
      "is_readlater": false,
      "item_id": "336",
      "photos": [
        "http://192.168.0.10:8080/media/images/image.jpg",
        "http://192.168.0.10:8080/media/images/image2.jpg"
      ],
      "status": 1,
      "summary": "إن هتافات الطلبة وبحسب تصريحات الطراونة التي أدلى بها عبر التلفزيون الأردني
المعتصمين يظهر بها النفس الحزبي شبيهة بالهتافات التي أطلقت في سوريا وتونس\n.عشرات بل مئات الحملات التي
قامت بها النقابات ومراكز جمعيات حقوقية واحزاب بل واشخاص كافراد دون ان تطلب ترخيص لهذه الحملات ، هل

}
```

Statistics - Increment article reads count

Endpoint:

```
/article/mark_read
```

Allowed Methods:

```
POST
```

Headers:

```
Authorization: Token {TOKEN}
```

The token is acquired from the login / registration endpoints described above.

Parameters:

```
article_id
```

Returns:

```
HTTP 200 on success. 400, 404 otherwise
```

Statistics - Increment article shares count

Endpoint:

```
/article/mark_share
```

Allowed Methods:

```
POST
```

Headers:

> Authorization: Token {TOKEN}

The token is acquired from the login / registration endpoints described above.

Parameters:

> article_id

Returns:

> HTTP 200 on success. 400, 404 otherwise

Subscriptions

Fetch Subscriptions

Endpoint:

> /subscriptions/list

Allowed Methods:

> GET

Headers:

> Authorization: Token {TOKEN}

The token is acquired from the login / registration endpoints described above.

Parameters:

page: 1, 2, 3 … etc

Returns:

```
{
    "count": 1,
    "next": null,
    "previous": null,
    "results": [
        {
            "id": 2,
            "is_subscribed": true,
            "title": "اسواق",
            "type": "category",
            "website": {
                "id": 1,
                "image": {
                    "caption": "asdas",
                    "file": "http://192.168.0.10:8080/media/images/2016/06/18/image.gif",
                    "height": 300,
                    "width": 200
                },
                "name": "Khaberni"
            }
        }
    ]
}
```

Filter Subscriptions

This endpoint is used in the right side menu in the Android app. Fetches the list of countries, keywords and websites the user is subscribed to and their "new" articles counts.
Endpoint:

/subscriptions/filter

Allowed Methods:

```
GET
```

Headers:

```
Authorization: Token {TOKEN}
```

The token is acquired from the login / registration endpoints described above.

Parameters:

```

```

Returns:

```
{
   "countries": [
      {
         "count": 0,
         "id": 1,
         "name": "Jordan"
      }
   ],
   "keywords": [
      {
         "count": 0,
         "id": 3,
         "name": "test"
      }
   ],
   "websites": [
      {
         "categories": [
            {
               "count": 0,
```

```
            "id": 2,
            "name": "اسواق"
          }
        ],
        "count": 0,
        "id": 1,
        "name": "Khaberni"
      }
    ]
}
```

Favorites

List

Endpoint:

```
/article/favorite/list
```

Allowed Methods:

```
GET
```

Headers:

```
Authorization: Token {TOKEN}
```

The token is acquired from the login / registration endpoints described above.

Parameters:

```
page: 1, 2, 3 … etc
```

Returns:

```
{
    "count": 1,
    "next": "",
    "previous": "",
    "results": [
        {
            "body": "ابو العبد الذي\n.كان كفيلا لتغيير مسار حياة عائلة الحاج السبعيني ابو العبد\nخبرني - خطأ طبي
معاناته علها تجد صدى لدى\nزارت كاميرا \"خبرني\" منزله المتواضع في حي الغويرية بمحافظة الزرقاء لنقل\n

Add

Endpoint:

```
/article/favorite/add
```

Allowed Methods:

```
POST
```

Headers:

```
Authorization: Token {TOKEN}
```

The token is acquired from the login / registration endpoints described above.

Parameters:

article_id

Returns:

HTTP 200 on success, 404, 400 otherwise

Remove

Endpoint:

/article/favorite/remove

Allowed Methods:

POST

Headers:

Authorization: Token {TOKEN}

The token is acquired from the login / registration endpoints described above.

Parameters:

article_id

Returns:

HTTP 200 on success, 404, 400 otherwise

Read Later

List

Endpoint:

```
/article/readlater/list
```

Allowed Methods:

```
GET
```

Headers:

```
Authorization: Token {TOKEN}
```

The token is acquired from the login / registration endpoints described above.

Parameters:

```
page: 1, 2, 3 … etc
```

Returns:

```

Add

Endpoint:

```
/article/readlater/add
```

Allowed Methods:

```
POST
```

Headers:

```
Authorization: Token {TOKEN}
```

The token is acquired from the login / registration endpoints described above.

Parameters:

```
article_id
```

Returns:

```
HTTP 200 on success, 404, 400 otherwise
```

Mark As Read

This endpoint archives the article from list by marking it as read (after the user has read the article, he/she can mark it as read)

Endpoint:

```
/article/readlater/markasread
```

Allowed Methods:

```
POST
```

Headers:

```
Authorization: Token {TOKEN}
```

The token is acquired from the login / registration endpoints described above.

Parameters:

```
article_id
```

Returns:

```
HTTP 200 on success, 404, 400 otherwise
```

Remove

Endpoint:

```
/article/readlater/remove
```

Allowed Methods:

```
POST
```

Headers:

```
Authorization: Token {TOKEN}
```

The token is acquired from the login / registration endpoints described above.

Parameters:

```
article_id
```

Returns:

```
HTTP 200 on success, 404, 400 otherwise
```

Keywords

List

Endpoint:

```
/keyword/list
```

Allowed Methods:

```
GET
```

Headers:

```
Authorization: Token {TOKEN}
```

The token is acquired from the login / registration endpoints described above.

Parameters:

```
page: 1, 2, 3 … etc
```

Returns:

```
{
    "count": 1,
    "next": null,
    "previous": null,
    "results": [
        {
            "content": "test",
            "id": 3
        }
    ]
}
```

Add

Endpoint:

```
/keyword/add
```

Allowed Methods:

```
POST
```

Headers:

> Authorization: Token {TOKEN}

The token is acquired from the login / registration endpoints described above.

Parameters:

> content

Returns:

> HTTP 200 on success, 404, 400 otherwise

Remove

Endpoint:

> /keyword/remove

Allowed Methods:

> POST

Headers:

> Authorization: Token {TOKEN}

The token is acquired from the login / registration endpoints described above.

Parameters:

> content

Returns:

HTTP 200 on success, 404, 400 otherwise

Comments

Count

Endpoint:

/comments/count

Allowed Methods:

GET

Headers:

Authorization: Token {TOKEN}

The token is acquired from the login / registration endpoints described above.

Parameters:

id: the article id

Returns:

```
{
    "message": 0,
    "status": true
}
```

List

Endpoint:

```
/comments/
```

Allowed Methods:

```
GET
```

Headers:

```
Authorization: Token {TOKEN}
```

The token is acquired from the login / registration endpoints described above.

Parameters:

```
id: the article id
```

Returns:

```
{
   "count": 1,
   "next": null,
   "previous": null,
   "results": [
     {
        "comment": "Hello",
        "id": 4,
        "submit_date": "2016-06-28T09:28:17Z",
        "user": {
           "email": "rakan.alhneiti123@gmail.com",
            "facebook_connected": false,
```

```
            "first_name": "Rakan",
            "google_connected": false,
            "id": 6,
            "is_registered": true,
            "last_name": "Alhneiti",
            "profile_pic": null
        }
    }
   ]
}
```

Add

Endpoint:

```
/comments/add
```

Allowed Methods:

```
POST
```

Headers:

```
Authorization: Token {TOKEN}
```

The token is acquired from the login / registration endpoints described above.

Parameters:

```
article_id
comment
```

Returns:

HTTP 200 on success, 404, 400 otherwise

Other

Contact Form

Endpoint:

/contact

Allowed Methods:

POST

Headers:

Authorization: Token {TOKEN}

The token is acquired from the login / registration endpoints described above.

Parameters:

name
email
subject
message

Returns:

HTTP 200 on success, 400 otherwise

Push Notifications

We have 3 ways in which notifications will be sent:

1) Through admin by adding a new notification record (manually)
2) Through feed subscription. So when you subscribe to a feed and ask to be notified on updates for that feed, you will receive a notification.
3) When new categories are added which fall under one of your interests. The android app doesn't display a UI notification in this case, but it shows the list of feeds added since last app run. This can be done by sending a request to /feed/list and using the "since" parameter it takes.

A notification will be sent with 3 parameters:
1) "target" which will indicate what the notification is about.
   Possible Values for this param:
   a) general: means that this is a generic notification (probably sent through admin)
   b) feed_update or keyword_update meaning that the notification is about a feed that has been updated or that some articles were found for a certain keyword.
   c) feed_interest which means that the some feeds have been added that fall under the user's interests.
2) "title" notification title
3) "Message" the content of the notification
4) "id", "type", "name" are only sent with keyword_update or feed_update notifications
5) "date" is only sent with feed_interest notification
